Bachelors of Applied Science

University of Waterloo
Sept 2020 - Present
(Expected Apr 2025)

Relevant Courses:

- Digital Computation (C#)
- Introduction to
Biomedical Design
(Prototyping)

PROJECTS

Portfolio Website

Personal Project | Jan 2021 - Present

Created a website from scratch using HTML and CSS to showcase my design abilities.

Constructed all website illustrations using Affinity Designer and Procreate.

Logo and Website Design

Hodlbot | Oakville, ON | Jan 2020 - May 2020

Drafted the Hodlbot logo and promotional banners using Adobe Illustrator and Affinity Designer.

Assembled formal business slideshows for meetings to support presenter's proposals.

Hand-drew rough sketches for the website design to improve visual appearance.

Wheelchair Scale and App Design

Iterative Design Project | Sept 2020 - Dec 2020

Designed and manufactured low-fidelity prototypes of an affordable scale for paraplegic individuals, taking human factors, requirements, and constraints into consideration.

Drafted a formal engineering report for the scale and application documenting all conceptual processes and analyses.

EXPERIENCE

Program Manager

STEM Fellowship | Oakville, ON | Oct 2019 - Apr 2020

Planned the 'Big Data Challenge' for high schools across Canada as part of a youth-led national network and nonprofit which attracted 100+ students.

Constructed data science challenges and mentorship programs for high school participants to support youth in STEM.

Intern

Long Wing International Inc. | Burlington, ON | Jun 2019

Produced and edited shipping documents for pharmaceutical drugs through Microsoft Office.

Ensured product quality by regulating warehouse through temperatures and wrapping packages.
